

40-year old Diabetes & Blood Pressure Patient gets cured at MindHeal Homeopathy

Mr Malhotra (name changed), a 40-year old businessman, came to MindHeal Homeopathy for getting cured of his Diabetes and High Blood Pressure. He exercised regularly in the gym and also went for morning as well as evening walks covering around 8-10 km. His diet was strictly as per his nutritionist's instructions. He also got his blood test done every month. Yet, despite all these efforts, he had Type-II diabetes and high blood pressure.

Through Mr Malhotra's detailed case analysis, it came to light that he was a hardcore perfectionist who always stuck to rigid deadlines. He was always in a hurry and never relaxed. He was over-concerned and over-conscious about his health and fitness. Such was his basic nature which was possibly responsible for his high blood pressure and blood sugar levels.

With the relevant homeopathic medicines prescribed by the doctors of MindHeal Homeopathy, his rigid approach became flexible. He started relaxing instead of rushing. The right remedy resulted in proper metabolization of body-glucose, which normalized his blood sugar and blood pressure levels.
