

Hard Hair Softened with Homeopathic Medicines at MindHeal Homeopathy

A Woman brought her 10 year old son to MindHeal Homeopathy for treating his hair which had turned hard. No amount of oils, shampoos or hair-treatments were able to soften his hair. Also, the boy had stopped reacting to anything and expressing himself. A counselor was appointed to normalize his condition, but it had a temporary impact.

Through the boy's complete case study, we discovered that he was once a bright boy who always secured more than 80-90% in his exams. But his mother pressurized him to perform even better. Whenever he watched TV or played with his friends, she would scold him or sometimes even beat him. As he could not find an outlet to express his feelings, he would start crying every time. To avoid his mother's rebuking, he even started lying and occasionally stealing. His marks in exams dropped to less than 60%. One day, his mother fell down while cleaning a ceiling fan. Instead of helping her, he watched the entire show listlessly and did not react to the situation. Thus, he became indifferent and heartless. But even then his mother continued beating him. As mind impacts the body, his hair became hard and he put on weight.

With the suitable homeopathic medicines prescribed by the respective Doctor at MindHeal Homeopathy, his indifference was reversed back. His attitude became positive, his intelligence returned and later his hard hair softened and his weight reduced to a proper measure.
