

Woman in late 20s having Poly Cystic Ovaries Disease cured successfully at MindHeal Homeopathy

A woman in her late 20s had approached MindHeal Homeopathy for treatment of Poly Cystic Ovaries Disease (PCOD). Her complaints also comprised irregular menses and excessive growth of facial hair (hirsutism), which are the primary symptoms of PCOD. There is no history of PCOD in her family.

After a thorough case analysis, it emerged that this woman was very ambitious about her career. She had completed her MBA and was working in a reputed multi-national company. After getting married, she moved to Hong Kong along with her husband. However, she was unable to find a job there matching her calibre. This added to her frustration as she did not want to give up on her career. So when she was offered a job suiting her expectations in a company in Mumbai, she took it up immediately and left her husband behind to pursue her career in a distant city. It was during her stay in Mumbai when she was diagnosed with PCOD.

With the appropriate homeopathic medicines prescribed by the consulting doctor at MindHeal Homeopathy, the woman's over-ambitiousness was cured. She realized the need for her family and went back to Hong Kong to be with her husband. Later, she took up a well-paying and satisfying job. Within a few weeks of her homeopathic treatment at MindHeal Homeopathy, her PCOD was completely uprooted and she became fully able to conceive safely. She now lives a happy life in Hong Kong with her husband and children.
